

Scenarios

Scenario 1

Actor: CCI Student

Goal: Find a job before graduation.

Context → Action: This CCI student is looking for a job before graduation. The student learns about our website from looking at a flier in the career center and decides to create an account to hopefully find a job that is best suited for them.

Scenario 2

Actor: CCI Student

Goal: Looking for internship opportunities

Context → Action: This CCI student is looking for potential internship opportunities. The student talks to one of their classmates who recently had a summer internship. The classmate tells them that they used our platform to find an internship. The CCI student decides to check out our website in hopes of finding an internship.

Scenario 3

Actor: CCI Professor

Goal: Helping a student with job search

Context → Action: A CCI Professor receives an email from a student who they have once written a letter of recommendation for. In the email, the student is seeking advice from the professor about where they should start looking for a job as they are approaching graduation. The professor replies to the student. The professor recommends that the student attend career fairs, consults with the career center, and checks out our website.

Scenario 4

Actor: Recruiter for Emerging Tech Company

Goal: Looking for employees

Context → Action: An emerging tech company is looking for interns/new hires. UNC Charlotte is a school known for its computer science program. With this in mind, they decided to post job listings on our website in hopes to recruit CCI students from UNC Charlotte.

User Stories

User Story 1

As a student, I want to upload my resume, portfolio, and certifications so that recruiters have a full view of my qualifications.

User Story 2

As a teacher, I want a platform that I can recommend to my students who are looking for a starting place to look for internships and job opportunities.

User Story 3

As a student, I need a job search platform that shows me job listings that match best with my resume and certifications.

User Story 4

As a recruiter, I want a platform where I can post job lists and get detailed information about the applicants skills and experience.

Feature (Group)

1. Profile Management Tool: Allows students to create profiles with details such as skills, certifications, portfolios, and resumes.
2. Job Search Filter: Enables students and recruiters to filter opportunities and candidates by location, skills, and job type.
3. Portfolio Upload Feature: Allows students to upload portfolios to their profiles for recruiters to view.
4. Job Recommendation Engine: Provides students with personalized job recommendations based on their profiles.
5. Recruiter Dashboard: Offers recruiters an interface to post job listings and filter candidates.
6. Interview Scheduling System: Enables recruiters to schedule interviews with candidates directly through the platform.
7. Notification System: Sends alerts to students when relevant jobs are posted or when they receive interview requests.
8. Feedback Tool for Advisors: Allows career advisors to leave comments on student profiles.
9. Application Tracking: Helps students track which jobs they've applied for and the status of their applications.
10. Internship Matching System: Lets faculty match students with internship opportunities based on skill set.
